HORSFORD'S

Autumn Supplement

1925

Cold Weather PLANTS

F. H. HORSFORD Charlotte, Vermont

LILIUM CANDIDUM (Madonna Lily) Large Bulbs 35 Cents Each, \$3.50 per Doz.

INTRODUCTION

This Fall Supplement, as usual, is not a full list of our stock. It is designed to call your attention to such plants and bulbs as are best set in Autumn, with some new varieties, and older ones omitted from this season's Annual.

Your attention is again called to the perennial border combinations now offered by us for a full season and proving very satisfactory and popular. In addition to the two original ones, we are offering others of different types, descriptions of which will be found on the same page. And we will be glad to make plans to fit your special needs. A charge of 10% of the value of the planting is made to cover expense, but this is refunded if the order is placed with us.

Prices in no case include postage or express charges, but are simply for plants or bulbs boxed and delivered to our nearest office. For those of our customers who prefer to receive their plants and bulbs by Parcel Post, we shall be pleased to forward in this manner such Plants and Bulbs as can be sent in this way at the following additional cost, which must be added to the value of each order to cover the cost of the postage and special packing necessary: to all points east of the Mississippi River, 10% extra; to all points west of the Mississippi River, 20% extra.

Copies of our catalogue will be gladly sent to anyone. If you have mislaid your Annual, ask for another.

PROTECTING PLANTS

Autumn planting is all right if done at the right time and the plants properly cared for. Perennials can be safely cut back and sent the first week in September, Iris and Peonies late in August if preferred. Shrubs, roses, vines and trees should not be moved until all growth for the season is past, which is not usually until after the middle of October. For transplanting evergreens late August and first part of September seem to be best for fall.

A little protection is essential for nearly all the hardy plants in winter; not a protection so much against frost, for this is natural to them, but a protection against mild winter weather. Plants that are hardy enough for the severest winter weather may be killed by alternate freezing and thawing. Nature often provides protection in the dead foliage falling about the plants but we should protect with three or four inches of marsh hay or straw put on in early November, with a little brush to prevent this covering being blown off. Shrubs and roses set out in the fall are helped by a banking of earth for several inches above level of the ground. A foot or more of this banking is not too much for roses.

LILIES

Most of the lilies of this list may be sent in September, a few, however, like Auratum, Speciosums, Henryi, and the beautiful Sargentiæ do not ripen until late September or early October.

Lilium Candidum makes a green leaved growth in the fall and

Lilium Candidum makes a green leaved growth in the fall and needs to be in the ground in time to get this growth. Our bulbs of Candidum from France are due and promised for the middle of September. Set the bulbs of Candidums two and one-half inches under and place a covering of straw mulch over them just before winter. All other lily bulbs are planted five to six inches under, and protected for winter with either straw or coarse strawy horse manure, put over the tops of beds just before hard freezing in the fall.

Tall.	EACH	D07
Lilium auratum. Gold-Banded Japan Lily	\$.60	
 L. batemanniæ. A most satisfactory lily. Color rich glowing apricot, unspotted, four to six flowers in an umbel. August L. canadense (Meadow Lily). WILD YELLOW LILY. Flowers vary in color—red and yellow. Grows 2 to 5 feet high and is a most hardy species. Nice 		4.00
to plant among shrubbery, and does quite well in shade. June and July. (Per 100 \$8.00)	15	1.50
L. canadense var. Rubrum	.25	
L. candidum (Madonna Lily). Should be set out	. =0	
early to insure full growth	.35	3.50
L. croceum. Golden yellow; closely follows L. da-		
huricum in blooming. Our bulbs of this are extra		
fine	. 50	5.00
L. elegans incomparable. Deep red; one of the	.30	3.00
best easy growers	.50	3.00
permanent Lily when grown in good garden soil.	. 20	2.00
L. elegans umbellatum. A strong, hardy and per-	. =0	
manent form which makes a fine showing when		
massed	.20	2.00
L. grayi. This species has a bulb of about the same		
size as canadense, but smaller. The flowers are		
dark orange red, fine for cutting to go with white		
flowers	. 40	4.00
L. hansoni. See L. maculatum	. 75	7.50
L. henryi. In form resembles the Speciosums, a splendid and healthy lily from the mountains of China. It grows, when established, four to five feet high, flowers orange yellow, banded with green. One of		
the easiest lilies to grow	.45	4.50

L. longiflorum. A grand lily, with pure white, funnel-shaped flowers, often 7 inches long. Often	EACH	DOZ.
used for forcing for Easter to take the place of the more tender Bermuda Lily. July L. maculatum (hansoni). Under favorable conditions attains a height of 3 feet. The flowers of this species are reddish orange, six to ten in a cluster; petals thick and durable. A rare Japanese Lily that is rather high in price, but so permanent and healthy has it been with us that we consider it one of the cheapest. We have never lost a bulb after it was once established, and we have bulbs which have bloomed every year for	.40	4.00
years. L. maximowiczi hybrid. An improved form result-	.75	7.50
the seed parent in flower but taller growing and with some apricot shading in the bloom. July and August. Three feet	1.00	10.00
L. philadelphicum. A fine native lily which is found growing on sandy soil and usually in partial		
shade. It demands good drainage and seldom thrives on heavy soil	.15	1.50
 L. regale. A magnificent new lily from China, with a vigorous constitution, medium height, bearing one to several handsome, white, fragrant flowers; slightly shaded pink outside and the lower inner surface primrose-yellow. It is a hardy lily and we consider it one of the finest novelties offered in many years. It seems to thrive on any good soil not too wet. Everyone who sees a Lilium Regale bed in bloom admires it. 1st size bulbs. (Per 100 \$60.00). L. sargentiæ. This beautiful lily, a native of Thibet and local in its distribution, grows taller than Regale with its flowers in a cluster at the summit. Its white flowers have a chocolate shading outside. It doesn't seem to like much moisture in winter and well drained soils suit it best. The stock of this lily is very limited. 	.75	7.50
The Lilium Speciosums are desirable for color and garden after the phlox and other bright colored flow The delicate form and color make them useful for cu	ers are	past.
L. speciosum, var. album. About the same as the well-known L. speciosum rubrum, except that the		
flowers are white. It is a more expensive Lily. August and September	.60	6.00

	EACH	DOZ.
L. speciosum, var. magnificum and melpomene are sub-varieties of <i>L. speciosum rubrum</i> and will be supplied at the same price as long as stock lasts	. 50	5.00
L. speciosum, var. roseum. White, shaded and spotted with rose	. 50	5.00
L. speciosum, var. rubrum. This fine, late-blooming plant from Japan is one of the most showy of Lilies; of medium height, and not difficult to grow. Blooms in August and September. Large flowering bulbs	. 50	5.00
L. superbum. American Turk's Cap Lily. This native Lily is one of the finest and most hardy of all. It often attains a height of 6 feet and produces a large number of flowers. Its flowers are bright orange in color, with dark spots. July	.20	2.00
L. tenuifolium. Siberian Coral Lily. One of the most delicate and charming species. One to two feet high with one to fifteen or more nodding, rich scarlet flowers	.40	4.00
L. testaceum. (L. excelsum.) Handsome nankeen- yellow flowers on a stalk 4 to 6 feet high. A novel color in lilies. July	2.00	
L. tigrinum, var. splendens. By far the best form of Tiger Lily we have had. It is taller, with handsome, large flowers and a much healthier plant. \$10 per 100.	.15	1.50
L. tigrinum, var. flore pleno. The old double Tiger Lily, and the only lily in which double flowers are pleasing. Very lasting	.30	3.00
L. tigrinum, var. fortunei giganteum. This has grown magnificently with us, has pyramidal spikes six feet high carrying in many cases fifty flowers of grand color. A great improvement on the old form, later flowering and more woo'ly stemmed than the type.	.35	3.50
L. willmottiæ. This new and rare Lily was discovered by Mr. Wilson in the Province of Hupeh, China. It is a very floriferous and hardy Lily; as many as 28 blooms have been borne on a single plant. In color it is like a shade of orange, or technically, it is that of rouge saturne. It is still very rare in cultivation. It blooms with the regale and seems to be quite hardy	1.00	10.00
and seems to be quite narry	1.00	10.00

SPRING FLOWERING BULBS Planting

A good time to plant Tulips, Narcissi, Hyacinths and Crocuses is during October and early November, before the earth freezes.

These bulbs will thrive in any well-drained garden soil, but the

addition of bonemeal will assure you extra fine flowers.

And it will help them if you place a handful of clean gritty sand under each bulb when planting. This is especially helpful in heavy or wet soil.

How deep to plant bulbs is a question that is sometimes a worry, especially since bulbs of the same varieties often vary in size.

A fairly accurate rule is to cover the bulb to a depth of about twice its height. That is—a bulb 2 inches high would be planted 4 inches deep, from the top of the bulb to the level of the soil.

Plant the bulbs with a pointed stick, or dibber, which may be notched to indicate the various depths. Be sure to cover the bulbs

closely and firmly with earth.

For naturalizing, or planting in sod, turn back the sod in small sections, work in a little bonemeal, plant the bulbs and put the sod back.

Tulips. Plant early varieties 4 to 5 inches apart, 5 inches deep. Darwins and Breeder Tulips, 5 to 6 inches apart, 6 inches deep.

Narcissi. Plant smaller sorts 4 to 6 inches apart; larger, 6 to 8

inches apart, 4 to 6 inches deep.

Hyacinths. Plant 6 to 8 or 10 in. apart, and 3 to 5 in. deep. Crocuses. Plant 2 to 3 inches apart (usually scattered irregularly), 3 to 4 inches deep.

DAFFODILS or NARCISSI

Early flowering bulbs, coming before tulips, and after crocuses. Fine for cutting; hardy and easy of culture. Though any good garden soil suits, they prefer rather stiff, deep soil and if the situation is such that they are shaded from the sun a third or half the time so much the better. It is well to cover these bulbs to keep out the frost during the first of the winter when setting is done late.

	EACH	H DOZ.	100
N. Golden Spur. Golden yellow, early. Double nose bulbs	.15	1.50	9.00
N. King Alfred. This giant stands high above others for size and deep yellow flowers on long stems. Double nose bulbs			0.00

IRIS

Iris may be planted very satisfactorily in the Fall. Bloom for the next season is practically assured. A moist, deep soil is needed for the Japanese Iris and some of the more grassy sorts and lime should not be used. But for the Hybrid Iris, commonly known as German Iris, moisture should be avoided. A dry exposed place suits them best and lime may be used with good results. Bonemeal is also good. Be careful not to bury the rhizomes in planting.

We list below all of our hybrid varieties with brief descriptions and have prefixed the rating of each by the American Iris Society. For our list and descriptions of Species and Japanese Iris, and more complete descriptions of the Hybrids, see our 1925 Annual.

PEONIES

It is hardly necessary to urge anyone to plant peonies. All are charmed by their beauty, and the one fault that is found is that they do not bloom long enough. Yet it is possible by accurately choosing varieties to have flowers for three weeks, and in the four colors, red, white, pink, and rose. We shall be glad to submit a list to those who are interested if they will tell us the colors preferred and something as to the space to be filled and the amount they wish to spend on the planting.

We give below our list of varieties with brief descriptions and have prefixed the rating of each by the American Peony Society.

	Victor Lemoine. Semi-rose type. Dark crimson guards, center lighter, early to midseason	.75	7.50

A REGAL GARDEN

Regal Lupins, Regal Delphinium, Regal Lilies—these names stand for glorified forms of well known garden plants; the Lupin, with its lovely spikes of pea like flowers; the Larkspur, tall and stately, yet beautiful beyond description; and the Lily, whose praises have been sung since flowers have been grown.

The Regal strains here offered, are, we believe, the finest of all mixed colors and forms that exist. The Lupin varies from its familiar blue or white, to pink, to lovely bicolors in all shades, and to creamy yellows and bronzes. The Larkspurs are medium in height, strong and healthy in foliage and habit, the greater part double in flower, and in combinations of color quite wonderful. The Regal Lily is no longer new in gardens. Similar in shape to the Easter lily, it is different in foliage, and in the lovely shading of its blooms. It increases rapidly in any good soil, and is extremely hardy.

To make your garden "Truly Regal," you must plant these three. No matter how small it is, they will give you pleasure and bloom for the house. And in the larger garden they lose no beauty by their surroundings.

Regal Lilies	. 75	7.50

Hardy Gardens and Perennial Borders

We continue to offer our Hardy Borders as we have heard from so many that have proved satisfactory. Of moderate size, they provide a strip of color against a fence, hedge, or building, as well as flowers for the home. Each has a Blue Print showing the exact placing of the plants. We are adding another longer border this season, one that need not be straight but may be made to fit an irregular outline.

Border No. 1, 20' x 6', 137 plants. \$20.00
Border No. 2, 20' x 6', 177 plants. 30.00
Border No. 3, 100' x 4', 319 plants. 50.00
The list of plants in Borders No. 1 and No. 2 will be found on

page 31 of the 1925 Annual. The list of perennials in Border No.

3 will be given upon application to anyone interested.

We are glad to advise our customers whenever possible, as to the best arrangements of plants for their needs, but we must ask that we are not requested to furnish more than the Blue Print with these collections. Extended inquiries will receive such attention as we are able to give. These plants should grow and thrive in any well-drained soil, in partial shade or full sun.

We can supply a Perennial Garden, 80' x 40', about 2,000 plants needed, costing \$300.00. Write us for further information if interested in this Garden Plan.

Hardy Biennials Best Set in the Fall

These Hardy Biennials are among the most satisfactory plants for color and effect that we have. For pure color nothing can equal solid beds of Violas, or the striking color schemes of Pansies. For cutting or for large color effects, Canterbury Bells are best, while for dignity and grace the Hollyhocks hold first choice. Sweet William combines bold color with delightful fragrance, and the charm of the Foxgloves is too well known to need mention here.

It is most unsatisfactory to buy plants in colors and find when they bloom that a great part are "something else." Only by buving the most carefully selected seed, and by using the greatest care while

handling in the Nursery, can this be avoided.

We make every possible effort in this respect, going to "Master" growers of seeds, for our stock. Even then, perfection is only approached, not reached. If you have been disappointed, the past season with our plants, we should be glad to know it, as that is one way we can determine whether we are getting good value. Needless to say, we cannot see these plants in bloom before selling them.

PANSIES-

We are growing only the Harkness Imperial Strain of Pansies this season as we are convinced that it is far better than any we have previously had, both in colors and size. Ten cents each, \$1.00 per doz.

Hardy Flowers for Winter

During the winter when garden flowers are scarcely to be had, many people recall the summer's glory with dried blooms or foliage. It is not generally known that many perennial plants may be used for this purpose and we are therefore offering a collection of such as are suitable for the purpose. These plants will also be found in our 1925 Annual and may be obtained separately. For drying, the flowers should be cut just as they are opening and placed at once in a dry, warm place, not in water. They should hold for many months. The Physalis should be cut before damaged by frost, the leaves removed, and the stems hung upside down.

WINTER FLOWER GARDEN OFFER 15 Plants for \$3.00 (Value \$4.00)

1 Achillea The Pearl
3 Armeria
1 Double Gypsophila
1 Double Gypsophila
1 Echinops (GLOBE THISTLE)
3 Eryngium
3 Physalis francheti
3 Statice latifolia

A Few Additions to the List of Plants Offered in our 1925 Annual

Prices of the following 25 cents each, \$2.00 per dozen, unless otherwise noted.

Adenophora liliflora. Ladybell. Resembling a campanula. Blue. Eighteen inches.

A. potanini. Bush Ladybell. Soft blue flowers. Two feet.

V. phoeniceum. The finest of the species. Neat tufts of dark green foliage, slender spikes of brilliant colored flowers, in white, rose, purple, and intermediate shades.

A Garden of Fragrant Herbs

No old-time garden was complete without its beds of Kitchen Herbs, its Lavender, and Mint. They provided savours for soups and stews, garnishes for more pretentious dishes, fragrant sachets, medicines, and flavors for jellies and cooling drinks.

Some of these Herbs always have been included in our list of Perennial Plants. Lately we have added many more and now we are offering all of those which so far have proven hardy here, and of which we have sufficient quantity. The great part are fragrant in leaf and flower, and all have been used in cooking we believe, or for some medicinal purposes. We attempt to indicate some uses of each.

Hyssopus officinalis. Hyssop. Medicinal.

Lavandula officinalis. LAVENDER. Sachets, etc.

Melissa officinalis. BALM. Fragrant.

Mentha piperita. Peppermint. Medicinal and for cooking.

Mentha spicata. Spearmint. Medicinal and for cooking.

Mentha requieni. Requien Mint. A low carpet of green reeking of pappermint. 50 cts.

Monarda didyma. Bee Balm, Oswego Tea. Sachets, etc.

Monarda fistulosa. WILD BERGAMOT. Sachets, etc.

Origanum onites. Pot Marjoram. Seasoning.

Ruta graveolens. Rue. Used medicinally.

Salvia officinalis. GARDEN SAGE. Seasoning.

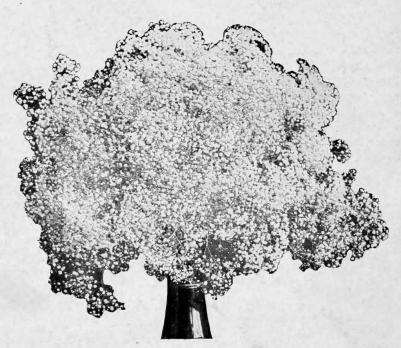

Satureia montana. Winter Savory. Seasoning.

Thymus vulgaris. Common Thyme. Seasoning and sachets.

Thymus citriodorus. Lemon Thyme. Seasoning and sachets.

Thymus serpyllum. Mother of Thyme. Seasoning and sachets.

All the above 25 cts. each, \$2.00 per dozen except as noted.

Gypsophila paniculata Double
